Eau Claire, WI | 715.828.2142 | kingbriant.88@gmail.com | <https://github.com/kingbgreen5> | <https://bk-resume.onrender.com/> | <https://www.linkedin.com/in/brian-k-84105a16a/>

SUMMARY

Project-driven junior full-stack web developer with hands-on experience building React applications, REST API integrations, and PostgreSQL-backed web apps. Skilled in JavaScript, React, Node.js, Express, Sequelize, PostgreSQL, API data handling, authentication patterns, and deployment workflows. Background in industrial mechanics, precision measurement, customer communication, and entrepreneurship brings strong troubleshooting skills, attention to detail, and practical problem-solving experience.

EDUCATION

University of Wisconsin

Full-Stack Web Development Bootcamp Graduate

Chippewa Valley Technical College

Associate Degree, Industrial Mechanical Technician

University of Wisconsin–Eau Claire

Bachelor's Degree, History

EXPERIENCE

Precision Measurement Technician

2021–2023

Martin Calibration

- Worked with precision measurement processes requiring accuracy, consistency, and attention to detail.
- Followed technical procedures and quality standards in calibration-related work.
- Developed strong habits around documentation, measurement accuracy, and process reliability.

Entrepreneurship / E-Commerce / Customer & Supplier Communication

2020–2022 : 2023–Present

Amazon/Etsy Business

- Built and managed web-based sales and business workflows.
- Gained experience with entrepreneurship, product presentation, customer service, and online business operations.
- Developed practical problem-solving and communication skills in a customer-facing environment.

Industrial Mechanic

2018–2020

Brunk LLC

- Wrote and implemented a PLC Ladder Logic program and supporting hardware to replace dated equipment.
- Performed electrical and mechanical troubleshooting on industrial systems.
- Diagnosed equipment issues and implemented practical repairs in a production environment.

PROJECTS

Fail2Feed: Reliability Database | Full-Stack Web Application | React, Node.js, Express, Sequelize, PostgreSQL |

Live Site: <https://fail2feed-plt7.onrender.com/>

- Built a full-stack reliability tracking application using React, Express, Sequelize, and PostgreSQL.
- Created database-backed functionality for recording user-submitted reliability data.
- Designed frontend forms for submitting structured reports and sending data to backend API routes.
- Debugged frontend-to-backend data flow issues involving API requests, form payloads, and database records.

PokéLore.net | React/Vite Data Application | React, Vite, React Router, JavaScript, JSON | Live Site: <https://pokelore-net.onrender.com/>

- Built a React/Vite website for exploring Pokémon data across generations.
- Created searchable Pokédex entries, Pokémon detail pages, move pages, ability pages, learnsets, and evolution chains.
- Implemented React Router navigation between Pokémon, moves, and abilities.
- Generated and organized large JSON datasets for Pokémon, moves, abilities, learnsets, and evolution chains.
- Improved performance and maintainability by splitting large learnset and evolution data into smaller files.
- Built reusable components including summary cards, detail cards, learnset cards, and evolution displays.
- Designed mobile-friendly layouts with compact cards, type badges, and horizontal scrolling evolution trees.

Rover Link | React API Application | React, JavaScript, REST APIs, Render | Live Site: <https://rover-link.onrender.com/>

- Built a React application for searching Mars rover photos using external API data.
- Integrated Mars rover image search functionality for Curiosity and Perseverance.
- Troubleshoot API format errors, Vite asset paths, and Render deployment issues.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, React, React Router, Vite, JSX, Responsive Design, Bootstrap

Backend: Node.js, Express.js, REST APIs, Sequelize

Databases: PostgreSQL, MySQL, MongoDB

Tools & Deployment: Git, GitHub, npm, Render, VS Code, environment variables

Additional: JWT authentication patterns, Axios, JSON data, API integration, debugging, PLC Ladder Logic

ADDITIONAL STRENGTHS

- Strong debugging mindset from both software and industrial troubleshooting backgrounds. - Comfortable learning new tools through documentation, experimentation, and project-based practice. - Able to communicate technical issues clearly and work through problems step by step. - Practical experience building complete projects from idea to deployment.
